

AM3S overall function

Note: Api calls one after another, that is, when the end of an Api, call the next,
Otherwise it will appear the Api function failure.

Note: all methods are parallel ,no order.

get user id: getUserId ()

set user id: setId (int id)

check random number: sendRandom ()

set user information: setUserInfo (int age, int height, int weight, int gender, int unit, int target, intctivityLevel)

Note: set user information once after connect success first,then set it when modify information.Need set id after connect device first,so as setting functions.

AM3S Function A – get battery

Note: Api calls must be one by one ,when the end of an Api can call another, otherwise it will cause function failure.

function A: queryAMState ()

AM3S Function B – get idps

function B: getIdps ()

AM3S Function C – reset device

function C: reset (int id)

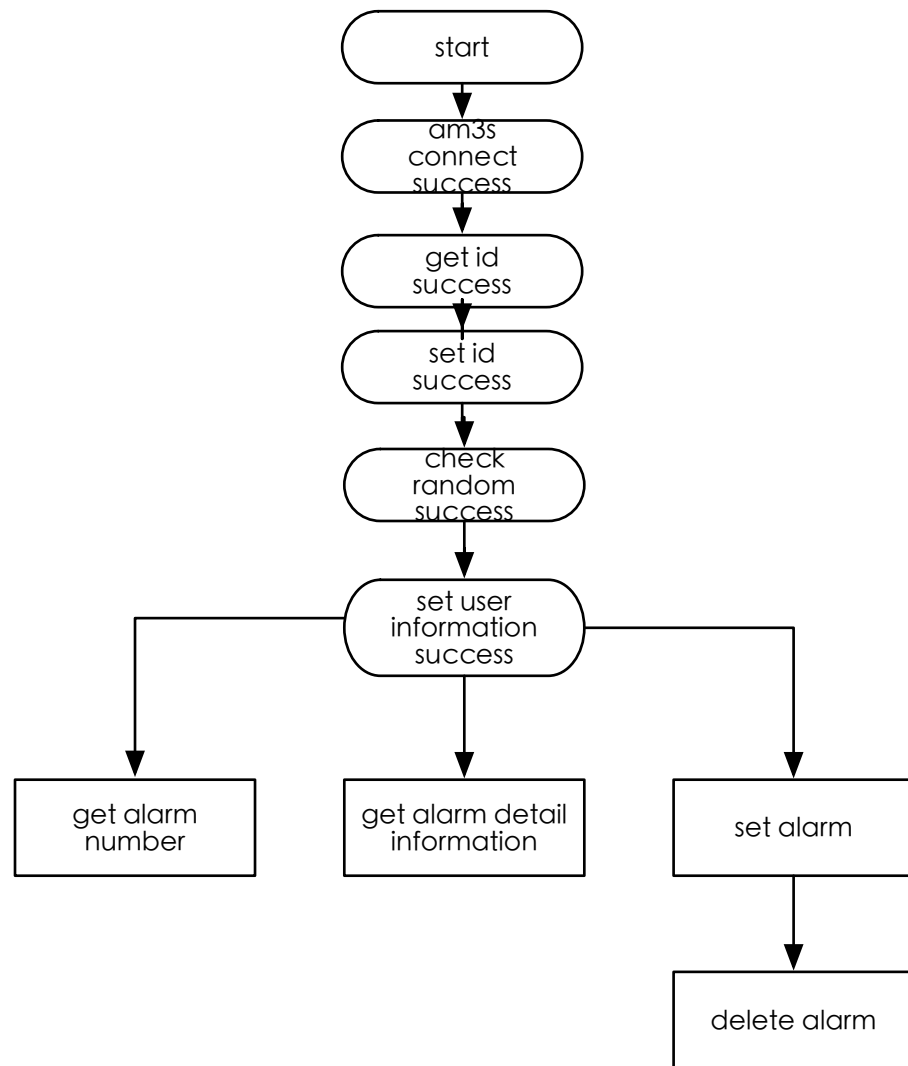

Note: Calling reset after set user id

AM3S Function D – disconnect

function D: disconnect ()

AM3S Function E – alarm

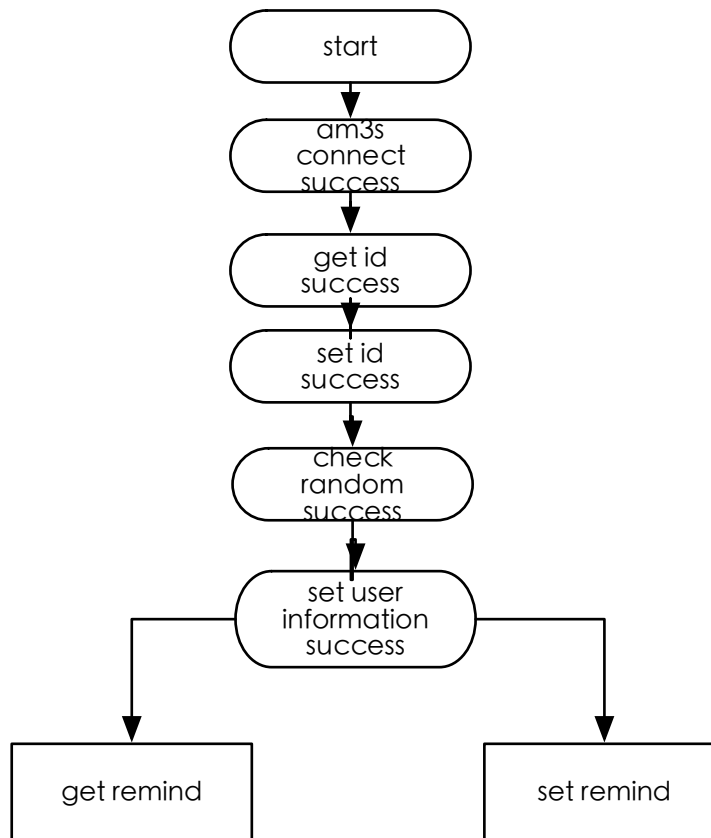

function E1: set alarm: setAlarmClock (int id, int hour, int min, boolean isRepeat, int[] weeks, boolean isOn)

function E2: get alarm number: getAlarmClockNum ()

function E3: get alarm detail information: getAlarmClockDetail (int... ids)

function E4: delete alarm: deleteAlarmClock (int id)

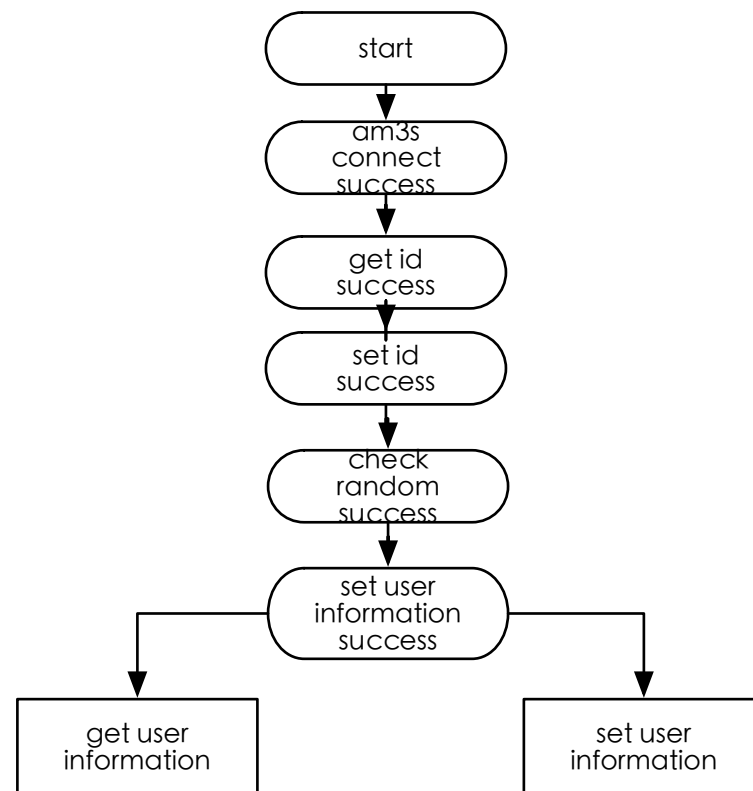

AM3S Function F – activity remind

function F1: set remind: `setActivityRemind (int hour, int min, boolean isOn)`

function F2: get remind: `getActivityRemind ()`

AM3S Function G – user information

function G1: set user information: setUserInfo(int age, int height, int weight, int gender, int unit, int target, intctivityLevel)

function G2: get user information: getUserInfo ()

AM3S Function H – set bmr

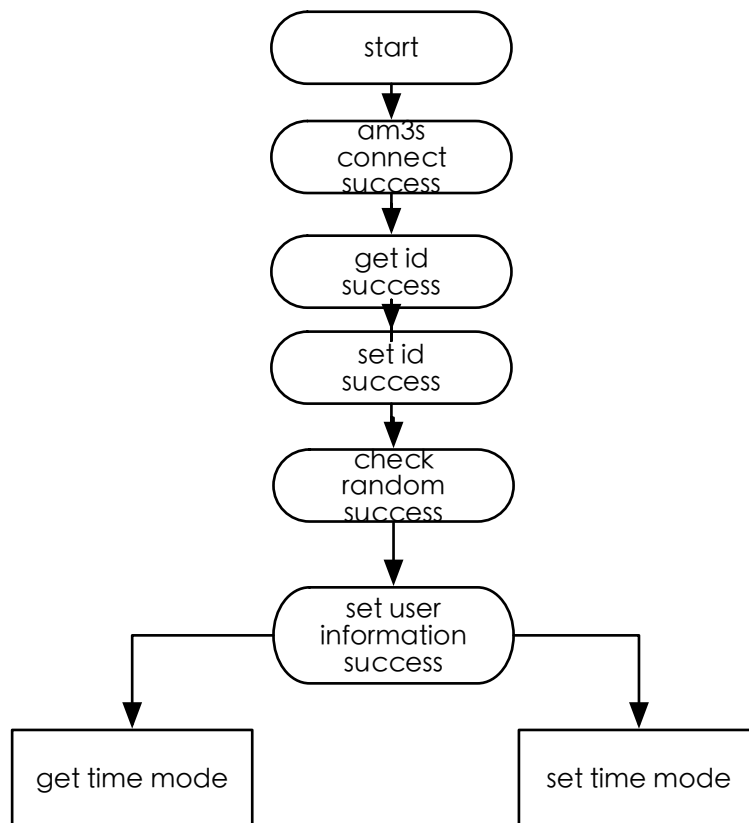

function H: set bmr: setUserBmr (int bmr)

AM3S Function I – synchronize time

function I: synchronize time: syncRealTime ()

AM3S Function J – time mode

function J1: set time mode: setHourMode (int hour)

function J2: get time mode: getHourMode ()

AM3S Function K – synchronize stage data

function K: synchronize stage data: syncStageReportData ()

AM3S Function L – synchronize activity data

function L: synchronize activity data: syncActivityData ()

AM3S Function M – synchronize sleep data

function M: synchronize sleep data: syncSleepData ()

AM3S Function N – synchronize real data

function N: synchronize real data: syncRealData ()
